

**DOE invites comments on
INEEL Long Term Stewardship Implementation Plan**

The U.S. Department of Energy Idaho Operations Office is asking for the public to comment on its plan for implementing a site-wide Long-Term Stewardship program at the Idaho National Engineering and Environmental Laboratory. The public comment period runs through August 15, 2003.

After the cleanup mission is complete at the INEEL, the Long-Term Stewardship program will remain to ensure cleanup measures remain protective of human health and the environment. The program will also ensure that records and information about cleanup projects and land use remain available for local, state and federal agency decision makers now and in the future.

More information about the INEEL Long-Term Stewardship Program is available online at <http://www.inel.gov/environment/ineel-lts.shtml>. The implementation plan will be made available for download from a link on this website, as well as a form so interested stakeholders can provide their comments online. Hard copies can be requested by calling (208) 526-3183 or by email to campjl@inel.gov. For those who prefer to submit comments in writing, comments can also be mailed to:
